DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4 and 24-27, drawn a leather product, classified in class 530, subclass 356.
 - II. Claims 19-23, drawn to food casing, classified in class 428, subclass 34.8.
 - III. Claims 28 and 29, drawn a method of making a collagen product, classified in class 8, subclass 404.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions food casing and leather product have different modes of operation, different functions, and different effect. The food casings are use for packaging to make food product such as sausage and hotdogs. While leather product are use to make article of clothing such as jackets, shoes and gloves.
3. Inventions III and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP §

806.05(f)). In the instant case the process can be used to make a different product such as leather product, for example, leather gloves, pants, jackets and shoes.

4. Inventions III and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make a different product such as food product, for example, food casing.

5. In the instant case the process can be used to make a different method such as leather products. For example, gloves, pants, jackets and shoes. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Conclusion

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
